

ASTHMA RESCUE KIT™

Seamless transition from one mode of therapy to another. Across the continuum of care.

The ASTHMA RESCUE KIT™ is an aerosol delivery system for the severe asthmatic that seamlessly transitions between all modalities of aerosol therapy. It is based on the Medicator® Aerosol Maximizer high-efficiency aerosol drug delivery system and nebulizer, with Möbius™ aerosol and medical gas delivery technology. The system provides:

- Individual unit dose treatments
- Continuous nebulization therapy
- Easy addition of Heliox any time
- A nebulizer characterized for heliox operation

For technically demanding aerosol and medical gas therapy.

A simple, classic principle that really makes sense. The ASTHMA RESCUE KIT™ features an integral reservoir bag that enhances aerosol drug delivery by compensating for a six foot delivery tubing and for driving the nebulizer with heliox and oxygen mixture.

A closed low-flow, zero-resistance system, with integral exhalation filtration, offers many benefits, including:

- Low flow, no air entrainment
- Reservoir bag that meets inspiratory demands with minimal gas usage
- A soft, comfortable, *portless* vinyl mask
- Technology that conserves expensive heliox, requires only 80/20 mix
- Technology that conserves medication usage; reduces waste
- The use of heliox that reduces turbulence and work-of-breathing
- The use of helium from 50-80% using 80/20 mixture
- Maximum heliox consumption only 8 L/min
- Built-in filtration that protects against inhaling second-hand drugs
- Built-in filtration that protects therapist from exhaled patient droplets
- A mask configuration that is easily switched to mouthpiece
- A solution that is more versatile and cost-effective than competing devices
- Lower total-cost-of-use per ER visit than conventional devices
- A flowmeter or pole mount with built-in O₂ analyzer port
- Ready-to-use packaging hang bag with optional Peak Flow Meter
