

Freedom to focus.

LifeGas solutions for homecare allow you to save time, reduce expenses and care for your patients.

Overcome challenges in your market. Our O2SHIELD subcontracting solution delivers for homecare providers.

O2SHIELD is protection from today’s financial and logistical challenges. You have the freedom to lease our equipment packages, or use your own equipment. O2SHIELD’s built-in efficiencies allow you to see profit immediately without costly capital investments. You save even more by decreasing your overhead associated with the delivery of oxygen. And you’re free to focus on what is most important: the patient.

Freedom of choice for your business and your patients.

Expand your offering with our complete oxygen-solutions inventory, production and delivery service. You can afford to offer your patients the right modality for their lifestyle, including portable oxygen concentrators (POC) and oxygen generating portable devices (OGPD). You can satisfy your referral requests such as home liquid services. We provide all five classes of medical oxygen, including liquid, gaseous, stationary, portable and home transfill concentrators using the manufacturer of your choice.

Service that delivers - from set-up to pickup.

In-home equipment set up, ancillary supplies, preventative maintenance checks and equipment cleaned to meet the high accreditation standards of healthcare providers.

Simplicity of a package-based fee.

Choose the O2SHIELD package that works for you and your patients, and we’ll handle everything for a monthly fee. Your choices include:

Concentrator & cylinders package	Portable concentrator package	Concentrator & LOX package	LOX only package	Concentrator & transfill device package
