OXYTRAVEL® worldwide

LifeGas, a division of Linde Gas Therapeutics and member of The Linde Group, is pleased to announce the launch of OXYTRAVEL®, a groundbreaking service that brings oxygen-dependent patients the freedom to travel.

What is OXYTRAVEL®?

OXYTRAVEL® takes care of all medical oxygen needs throughout your patient's journey, freeing the patients and you of the worries of making sure these needs are handled as part of the travel plans. Underpinned by Linde's extensive national and international network, OXYTRAVEL® guarantees delivery of medical oxygen in dozens of countries around the world - whether the patient is travelling by train, by car, by plane or even taking a cruise.

*For domestic trips, the local Life Gas provider will take care of the organization.

How does it work?

OXYTRAVEL® works in partnership with SOS for international travel and LifeGas for US national travel, to provide patients with around-the-clock service. Patients planning a journey simply need to call our service line. Aided by comprehensive patient files, OXYTRAVEL® does the rest – supplying the necessary equipment at the airport, station, harbour, hotel or any other location.

Three steps to a trouble-free holiday:

1. You or your patient can contact OXYTRAVEL®.
2. Complete the patient file.
3. Enjoy your trip!
